SUMMARY

Self-taught Computer Engineer specialized in web systems, backend architecture, containers, and DevOps. I design and ship sustainable, end-to-end applications using Domain-Driven Design and lead engineering teams to production. An aviation enthusiast, I bring a cockpit mindset: safety first, clear communication, and redundancy by design.

CORE SKILLS

Languages	Python (15+ yrs), JavaScript, TypeScript, SQL, Bash
Backend	Django, Django REST Framework, Django Ninja, FastAPI, SQLAlchemy
Frontend	React, Next.js, Expo (React Native)
Data & AI	PostgreSQL, PostGIS, GeoDjango, OpenAI API
DevOps & Cloud	Docker, AWS (Lambda, Batch, API Gateway), Jenkins, GitHub Actions, GNU/Linux
Practices	Domain-Driven Design, Tech Leadership, CI/CD, end-to-end solution design

EXPERIENCE

// Most recent roles

Senior Software Engineer — Loka Inc.

JUN 2024 – PRESENT

United States · Software consultancy

- Currently Tech Lead for a cross-functional web, mobile, ML, and backend product in the health-span domain — guiding the team toward its goals and delivering a HIPAA-ready platform.
- Engineer backend systems across multiple startups as a senior individual contributor and technical lead.
- Built a pool-analysis system applying AI/ML for sentiment analysis.
- Developed an AI-driven, HIPAA-compliant medical summary generation service.

Python · FastAPI · Django Ninja · OpenAI · AWS Bedrock · SQLAlchemy · PostgreSQL · AWS Lambda · AWS Batch

Tech Lead — Mais Todos LTDA

DEC 2023 – JUN 2024

Brazil · Product company

- Led a 5-developer team shipping backend and frontend software to production for an app serving a 5M-user base at ~34k requests/day.
- Acted as the bridge between the engineering team and management, aligning delivery with business goals.

Python · Django · Django Ninja · GeoDjango · PostGIS · Expo · AWS API Gateway

Senior Backend Engineer — Routable Inc.

MAR 2022 – SEP 2023

United States · Product company

- Maintained core services handling connectivity with third-party ledgers for a B2B payments platform.
- Owned integration reliability across external financial systems.

Python · Django · Django REST Framework

EDUCATION

B.Eng. in Computer Engineering — Universidade Potiguar

2012 – 2016

ADDITIONAL

Open Source & Teaching: Active contributor to open-source projects. I mentor technical people to sharpen their craft and guide non-technical people through their first steps into programming.

Volunteer — Fullstack Engineer, Centro Capoeira:
Building tech for a nonprofit restoring the Amazon rainforest. centrocapoeira.com.br
